

Tab 1

```
#include<iostream>
using namespace std;
void library(int (&id)[2], string (&name)[2])
{
    for(int i=0;i<2;i++)
    {
        cin>>id[i];
        cin>>name[i];
    }
}
void display(int (&id)[2], string (&name)[2])
{
    cout<<"Book ID Book Name"<<endl;
    for(int i=0;i<2;i++)
        cout<<id[i]<<" "<<name[i]<<endl;
}
int main()
{
    int id[2];
    string name[2];
    library(id,name);
    display(id,name);
}
```
